Previously, during his 27 years in industry, Andy provided leadership support to a Fortune 50 high speed, high volume manufacturing firm in technical, management, Information Services, and project management positions. This included domestic and international assignments. This experience was in areas of: new machinery design, construction, and installation; IP telephone and data infrastructure; mainframe upgrades and relocation; Fire and Security system designs and implementation; dedicated LAN/WAN installations; acquisition of a leased facility and personnel relocation; design of a new \$43 million IT facility; Year 2000 project involving over 8000 manufacturing and facility components; multiple world-wide multi-company task forces; and development of administrative processes. Additionally, for seven years Andy provided technical support to an electrical public utility in their technical and operational support areas.

Andy received a BS in Electrical Design Engineering Technology and a Certification in Air Pollution Technology from Penn State University, a MBA from Virginia Commonwealth University, and a Master’s Certificate in Project Management from George Washington University in Washington, DC. He is a Registered Professional Engineer (P.E.) and a Certified Project Management Professional (PMP).
